Temporary batch to clean improper position number in the structure.

Problem: Structure numbers shown in page view can be wrong - dur of a non linear numbering in the database.

- Installation: put the batch in the tikiwiki root - after use, better to move or delete the script
- **Dump your database - just in case**
- Run the script from the brower
    - http://yoursite.com/batch_clean_structure.php?page_ref_id=x where x if the id of the structure
    - http://yoursite.com/batch_clean_structure.php to clean all the structures
- Move or remove the script from the tikiroot
