

Module wiki_last_comments

This module shows the wiki page and the comment title for any comments made since the last time the user visited the site.

Parameters

Lists the specified number of comments starting from the most recently posted.

[Go to the source code](#)

Parameters	Accepted Values	Description	Default	Since
<code>moretooltips</code>		If set to "y", the name of the object on which a comment is made is not displayed in the module box, but instead moved in the item's tooltip.	n	
<code>language</code>	word	Comments about objects in this language only.		
<code>commentlength</code>	digits	If comments don't use titles this sets the maximum length for the comment snippet.	40	
<code>type</code>	word	Type of the objects from which comments will be listed. Possible values: wiki page, article.	wiki page	
<code>avatars</code>	alpha	Display user profile pictures instead of numbers.	n	

Demo

Last wiki comments

1. **Sublist:** Specify multiple (from Kroky on the matrix room)
2. **Sublist:** Specify multiple (from Kroky on the matrix room)
3. **Sublist:** Specify multiple (from Kroky on the matrix room)
4. **Sublist:** Specify multiple (from Kroky on the matrix room)
5. **Inline comments:** Here is a comment about targeted comments
6. **User Preferences:** feature_userPreferences must be enabled
7. **Mail notifications:** Setting' → Mail Notifications?
8. **Move Tiki to a new server:** Slightly different
9. **Roles:** How to activate Roles?
10. **Pretty Tracker:** This is exactly what I needed
