

User Notepad

This page needs new screenshots This application has been enhanced and a re-write is needed for 1.10

This feature is used to let users write notes, save them and use them when they want. The user notepad main screen list the user notes.

Enabling the Notepad feature

To enable the User Notepad, follow these steps: Go to **Control Panels > User Settings** and then in the **User Features** tab, enable the **User Notepad** feature.

! Plugin Image

The "id" parameter is not allowed unless "file_galleries_redirect_from_image_gallery" preference is enabled.

Once activated, users can access their notepad via My Account > Notepad or directly at www.example.com/tiki-notepad_list.php.

Listing notes

! Plugin Image

The "id" parameter is not allowed unless "file_galleries_redirect_from_image_gallery" preference is enabled.

! Plugin Image

The "id" parameter is not allowed unless "file_galleries_redirect_from_image_gallery" preference is enabled.

From this screen notes can be removed, notes can be read (clicking the name), notes can be saved to disk or deleted. A find feature is provided to search for notes containing some text. A note can also be uploaded from the local disk using the upload box at the bottom. Note that user notes are always stored in the database. The quota is configured as the same quota used for user files (see user files next).

Writing a note

! Plugin Image

The "id" parameter is not allowed unless "file_galleries_redirect_from_image_gallery" preference is enabled.

! Plugin Image

The "id" parameter is not allowed unless "file_galleries_redirect_from_image_gallery" preference is enabled.

In this screen you can write a new note.

Reading a note

Plugin Image

The "id" parameter is not allowed unless "file_galleries_redirect_from_image_gallery" preference is enabled.

Plugin Image

The "id" parameter is not allowed unless "file_galleries_redirect_from_image_gallery" preference is enabled.

This is how notes are displayed, note that you can read a note as normal text or as a Wiki page making wiki markup being interpreted.
