

# Plugin Aliases tab

## Overview

Use this tab to create a new wiki plugin, by using a modified copy of an existing plugin.

## To Access

From the Text Area Admin page, click the **Plugin Aliases** tab.

## Note

*if applicable*

The screenshot shows the 'Text area' administration interface. The top navigation bar has tabs for 'General Settings', 'Plugins', and 'Plugin Aliases', with 'Plugin Aliases' being the active tab. A 'No Tabs' button is also visible. Below the tabs, there's a section titled 'About plugin aliases' with a brief description and a link to find out more. The main content area is divided into several sections: 'General Information' (with fields for 'Plugin Name', 'Base Plugin' set to 'addtocart', 'Name', 'Description', 'Body Label', 'Dependencies', 'Filter', 'Validation', and 'Inline (No Plugin Edit UI)'), 'Simple Plugin Arguments' (with a 'New Argument' field), 'Plugin Parameter Documentation' (with a 'Default' field), 'Plugin Body' (with a 'Ignore User Input' checkbox), 'Default Content' (with a 'Parameters' field), and 'Composed Plugin Arguments' (with a 'Parameters' field). At the bottom right of the form is a 'Change preferences' button.
