Plugin Blog List

Use this wiki plugin to display posts from a site blog.

Parameters

Display posts from a site blog
Introduced in Tiki 1. Required parameters are in `bold`.
Go to the source code
Preferences required: feature_blogs, wikiplugin_bloglist

Parameters	Accepted Values	Description	Default	Since
Id	any string except for HTML and PHP tags *separator:* `:`	Select one or more blogs to list posts from. Limitation: if more than one blog is selected, private posts (drafts) will not be shown.		1
author		Only display posts created by this user (all posts listed by default)		3.5
dateEnd	date	Latest date to select posts from. (`YYYY-MM-DD`)		3.5
Items	digits	Maximum number of entries to list (no maximum set by default)		3.0
simpleList	(blank) y n	Show simple list of date, title and author (default) or formatted list of blog posts	y	3.5
dateStart	date	Earliest date to select posts from. (`YYYY-MM-DD`)		3.5
charCount	digits	Number of characters to display if not a simple list (defaults to all)		12.0
containerClass		CSS Class to add to the container `DIV.article`. (Default=`wikiplugin_bloglist`)	wikiplugin_bloglist	3.5
ellipsis	(blank) y n	If not a simple list and Character Count is non-zero, then marking this as yes will put ellipsis (...) at end of text (default).	y	12.0
more	y n	If not a simple list and Character Count is non-zero, then marking this as yes will put a "More" link to the full entry (default).	y	12.0
showIcons	y n	If not a simple list, marking this as no will prevent the "edit" and "print" type icons from displaying (default is to show the icons)	y	12.0

| `useExcerpt` | (blank) y n | If the blog has "Use post excerpt" enabled then use excerpts where available (default) | y | | 13.2 |
| `wordBoundary` | y n | If not a simple list and Character Count is non-zero, then marking this as yes will break on word boundaries only. | y | | 12.0 |
