Plugin Mono

Use this wiki plugin to display text in a monospace font. By default, the monospace font specified by the browser is displayed, but another monospace font recognized by the browser may be used as well.

Parameters

Display text in a monospace font
Introduced in Tiki 1.
Go to the source code
Preferences required: wikiplugin_mono

Parameters	Accepted Values	Description	Default	Since
(body of plugin)		Text that the font will be applied to		
font	text	Font name as recognized by browsers.	monospace	1

Examples

No Font Parameter

This code,

{MONO()}This is the browser's default monospace font.{MONO}
Would produce:
`This is the browser's default monospace font.`

With Font Parameter Set

This code,

{MONO(font="Lucida Console")}This is the monospace font called Lucida Console.{MONO}

Would produce this:

This is the monospace font called Lucida Console.
