

# PluginTikiManagerClone

This is a Wiki Plugin which embeds a button in a wiki page to perform a pre-configured clone or clone and upgrade action of an instance in Tiki Manager  
This makes it simple for operations like:

- Clone from production to staging
- Clone from staging to production
- etc.

Like PluginTikiManagerUpdate, it requires the Tiki Manager Package

# Parameters

Plugin PluginTikiDocFromCode failed : Either the module, plugin, preferences, tracker field or prefsexport parameter must be set, but not two or more.
