

Rating Tracker Field

This is a stub

Introduced in Tiki8, this is the corresponding tracker field to the feature Rating and Advanced Rating.

In Tiki12, at least, you have 3 modes:

- Stars
- Radio Buttons
- Single option: e.g. Like

You can also set the labels to something else different from the real values that will be stored for the calculation of average, etc.

In this example, below, the tracker field Rating was set with:

- Option: -2,-1,0,1,2
- Mode: Stars
- Labels: -2,-1,0,1,2

Tracker: Bugs & Wish list

Trackers **View Items**

If this is your first time, please read: [How to Submit a new item on the Wish](#)

Tracker Items **Insert New Item**

Items found: 1552

New Rating	Subject	Subj
(1) Monitoring pre-dogfood servers marc
