

Referer Stats

Overview

This page shows the different sources (*referring domains*) that have sent traffic to your Tiki site. Each **hit** represents a visit from a person who clicked to your site from the referring domain.

To Access

From the Admin menu, select **Admin > Referer Stats**.

or

Access **http://example.org/tiki-referer_stats.php**

Related Topics

- [Stats](#)
- [Admin](#)
- [Bugs and Wishes](#)

Note

You must enable the **Referer Stats** option on the General Settings tab of the General Admin page.

To use this feature, enable the **Referer Stats** option in the **Stats** area of the **General Settings** tab on the General Admin page.

Click **Clear Stats** to erase (*clear*) the referrer stats database.

See Stats Admin for additional site statistics

There is the option to view the Referer stats, through "Admin > Referer stats" (which will lead you to "**tiki-referer_stats.php**")

You will be able to see the domain from which the users came from when viewing your site:

They can be set at: "Admin home > Features > Administration Features > Referer Stats", for the site statistics (see previous figure in Stats Admin).

Click **Clear Stats** to erase (*clear*) the referrer stats database.
