

Search Stats

If you enabled the Search feature, you can also enable the search statistics at "Admin home > Search > Search features > Search stats".

The screenshot shows the 'Search Results' tab in the Tiki Admin interface. Under the 'Search type' section, 'MySQL Full-Text Search' is checked. In the 'Features' section, 'Search stats' is checked and highlighted with a red circle. Other options like 'Search Bar', 'Referer Search Highlighting', and 'Parse the results' are also checked. The 'Permissions' section at the bottom contains unchecked options for ignoring individual object permissions and category viewing restrictions.

General Settings Search Results

Search type ⓘ

☒ MySQL Full-Text Search ⓘ ↻

☐ Tiki-indexed Search ⓘ

Unless you have a reason to, you should use MySQL Full-Text Search feature instead.

Features

☒ Search Bar
Requires MySQL Full-Text Search (OK)

☐ Referer Search Highlighting ⓘ

☒ Parse the results
May impact performance

☒ Search stats ⓘ ↻

Permissions

ⓘ Enabling these options will improve performance, but may show forbidden results.

☐ Ignore individual object permissions

☐ Ignore category viewing restrictions ⓘ

Will improve performance, but may show forbidden results

Then, you can access them under "Admin > Search stats", which will lead you to "**tiki-search_stats.php**":

This page should edited and inserted into the Search section of the Tiki Admin Guide
