Security Search Results tab

Overview

Use this tab to configure how Tiki handles the security of specific items when returning search results.

To Access

From the Security Admin page, click the **Search Results** tab.

Note

These fields apply only for the Tiki MySQL Search, and can also be configured on the Permissions area of the Search General Settings tab.

Option	Description	Default
Ignore category viewing restrictions	Display items the user may not be entitled to view in search results. ⚠️ *Will improve performance, but may show forbidden results*	Disabled
Ignore individual object permissions	Display items the user may not be entitled to view in search results. ⚠️ *Will improve performance, but may show forbidden results.*	Disabled
