

Timesheet

Added in Tiki9, Timesheet allows to track time spent on different tasks and projects. It uses a special jQuery plugin called jTrack, which allows to have time counters on even if the user closes the browser or logs out for some reason. It is a very useful feature for project management, in which workers are expected to record the time spent on different tasks.

More information to come... stub

The screenshot shows the Tiki Wiki CMS Groupware interface. The top header features the Tiki logo and the text 'wiki cms groupware'. A 'LOG OUT' button is visible in the top right. Below the header, a 'Menu' sidebar on the left lists various options: Home, Wiki, File Galleries, Spreadsheets, Trackers, Admin, and TimeSheet (highlighted). The main content area displays the 'Time Tracker' section, which includes tabs for 'Time Tracker', 'Local Cache (Not Committed)', and 'Saved (Committed)'. The 'Time Tracker' tab is active, showing a list of tasks with columns for date, description, and time. The tasks are as follows:

Date	Description	Time
14.10.2011	testing timesheet from robert in trunk	0:08:48
14.10.2011	Email	1:01:35
14.10.2011	Another email box tralari-tralara through thunderbird also	0:03:59
14.10.2011	screenshoting timesheet for robert and marc	0:00:00

Each task entry includes links for 'Edit' and 'Delete' and a power icon. The interface also shows a 'New task | Delete all' button and checkboxes for 'C' and 'A'.
