

Transactional Email Providers

New in Tiki24

Leveraging SImMail, Tiki can send transactional emails (Password reset, notification of a wiki page update, etc.) via services such as:

- Mailgun
- Postmark
- Postage
- Send Grid
- Spark Post
- Amazon SES
- and others...

Why?

Because sending emails via Tiki (sendmail) or SMTP can cause issues: Limits on numbers of emails sent, slow delivery, lost emails, mails flagged as spam, etc. Basically because there is so much spam, legitimate projects suffer. The good news is that some services offer free to use entry level services (To promote the service so you upgrade to paid services as your needs grow). The bad news is a loss of data privacy.

How to use

Configure in the **Mail** section of `tiki-admin.php?page=general`

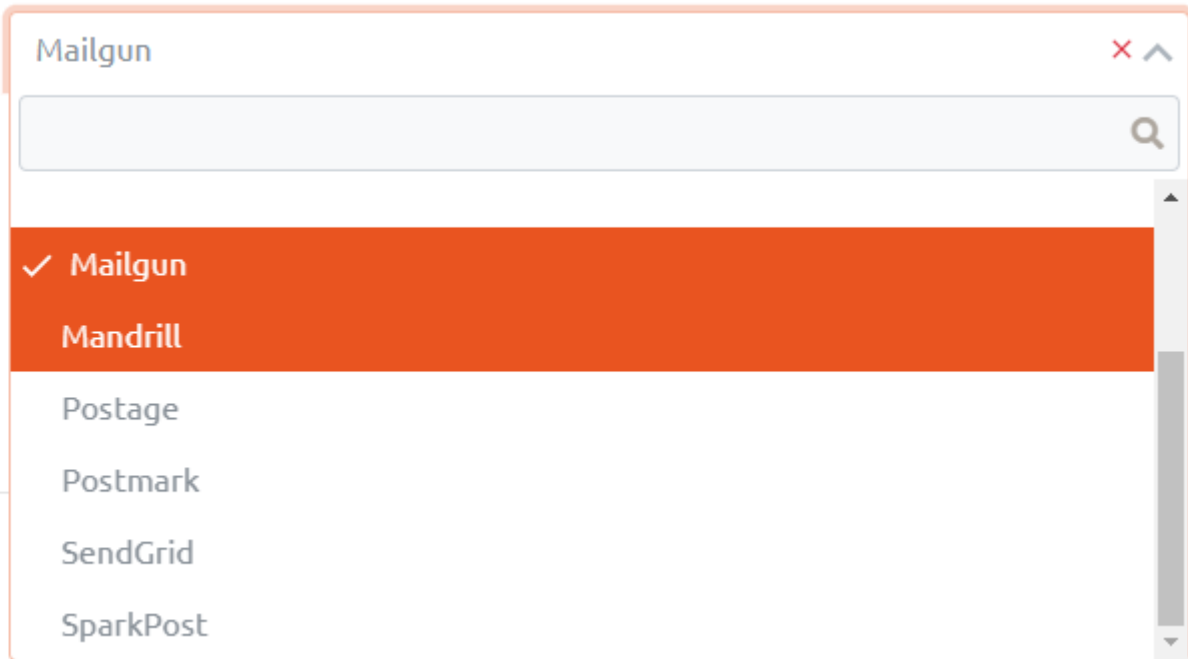

Mail sender

Mailgun Domain

Mailgun Key

Mailgun API Endpoint

SMTP server

The image shows a dropdown menu for selecting an SMTP server. The menu is titled "Mailgun" and has a search bar at the top. The options listed are: Mailgun (selected with a checkmark), Mandrill, Postage, Postmark, SendGrid, and SparkPost. The menu is highlighted with an orange border.

SMTP Server
Mailgun
Mandrill
Postage
Postmark
SendGrid
SparkPost

About the code

SlmMail is an "Integration of various email service providers in the Laminas\Mail". Since Tiki also already uses laminas/laminas-mail, it is very nice extra functionality with minimal complexity/overhead. laminas/laminas-mail is the continuation of Zend\Mail, which has been added to Tiki in Tiki11 (2013).
