Transactional Email Providers

New in Tiki24

Leveraging SlmMail, Tiki can send transactional emails (Password reset, notification of a wiki page update, etc.) via services such as:

- Mailgun
- Postmark
- Postage
- Send Grid
- Spark Post
- Amazon SES
- and others...

Why?

Because sending emails via Tiki (sendmail) or SMTP can cause issues: Limits on numbers of emails sent, slow delivery ost emails, mails flagged as spam, etc. Basically because there is so much spam, legitimate projects suffer. The good ews is that some services offer free to use entry level services (To promote the service so you upgrade to paid servic as your needs grow). The bad news is a loss of data privacy.

How to use

Configure in the **Mail** section of tiki-admin.php?page=general

About the code

SImMail is an "Integration of various email service providers in the Laminas\Mail". Since Tiki also already uses aminas/laminas-mail, it is very nice extra functionality with minimal complexity/overhead. laminas/laminas-mail is the continuation of Zend\Mail, which has been added to Tiki in Tiki11 (2013).
