Overview

Ustream Watershed Webcasting Platform

To Access

From the Video page, click the **Ustream Watershed** tab.

Note

This feature has been removed.

The screenshot shows a configuration page for Ustream Watershed. It is divided into several sections:

- Ustream Watershed Registration:** Includes a link for more information and a checkbox to "Activate the feature". The "Ustream Watershed" checkbox is checked, and there is a "Log errors to Tiki log" link.
- Configuration within Watershed:** A note about setting the webservice to point to `tiki-watershed_service.php` on the site and turning on Authentication Lock.
- Watershed Wiki plugins:** A note about using Wiki plugins like `WatershedBroadcaster`, `WatershedViewer`, and `WatershedChat`.
- Basic tracker settings:**
 - Tracker:** Information about channel tracking and permissions. Fields include "Tracker ID of Channel tracker", "Field ID of BrandId", and "Field ID of ChannelCode".
- Archive settings:**
 - Tracker:** Information about archived clips. Fields include "Tracker ID of Archive tracker", "Field ID of videoid", "Field ID of BrandId for Archive", "Field ID of ChannelCode for Archive", "Field ID of rtmpURL for Archive (url field type)", and "Field ID of flURL for Archive (url field type)".
 - Archive settings (optional):** Fields for "Field ID of Date string for Archive", "Field ID of Duration for Archive", "Field ID of Filesize for Archive", "Field ID of Title for Archive", "Field ID of Description for Archive (textarea field type)", and "Field ID of Tags for Archive (hebtags field type)".
- Flash Media Encoder:** A note about using Flash Media Encoder for higher-quality broadcasting. Field: "Flash Media Encoder shared secret".

A "Save" button is located at the bottom of the form.

Social Networks tab

Setting

Activate the feature

Ustream Watershed:
