Using Square Brackets

If you wish to include square brackets in your text (i.e. as regular text and not a link) simply add an additional open bracket to start. E.g.

`[[this would not be a link]`

Would render like this...

`[this would not be a link]`

Non-breaking space

Use `~hs~` to add the HTML " " for a non-breaking space.

Entering code

You enter code blocks by enclosing the block between `CODE()` and `CODE` tags (you need to put curly braces around the tags). Note this is a smarty construct, not a Wiki syntax.

Useful Links

- The Color Picker II is located at <http://www.pagetutor.com/pagetutor/makapage/picker/>
- WebDevlopper extension for Mozilla Firefox
- The wiki syntax is not standardised accross applications. There is an initiative to publish the Wiki-Syntax as an RFC from the IETF. See RFCWiki
