

“Powered By” Module Documentation

The "**Powered By**" module is designed to display attribution and credit information for Tiki Wiki CMS Groupware installations. This module allows administrators to show customizable messages, version details, theme credits, and powered-by icons, providing transparency and acknowledgment for the technologies used.

Example

Powered By

Powered by Tiki Wiki CMS Groupware v29.0vcs "Castor" | Theme: Fivealive-lite/Kiwi

How to Enable ?

Follow these steps to enable the Powered By module on your Tiki site:

1. Log In: Access your Tiki site as an admin user.
2. Go to Module Management:
 - Navigate to Admin > Modules in the control panel.
3. Search for the Module:
 - In the list of available modules, look for Powered By or use the search bar to find it quickly.
4. Enable the Module:
 - Click the Enable button to activate the module.
5. Assign a Position:
 - Set the module's position on the page (e.g., footer, sidebar) by selecting a layout zone from the dropdown or dragging it in the layout editor.

Configuration Options

Once the Powered By module is enabled, you can customize its appearance and behavior through these configuration options:

Parameters

Powered by Tiki, and others

[Go to the source code](#)

Parameters	Accepted Values	Description	Default	Since
<code>credits</code>	alpha	Shows theme credits (contents of credits.tpl) (y/n)		
<code>icons</code>	alpha	Shows various "powered by" icons (y/n)		
<code>tiki</code>	alpha	Shows "Powered by Tiki Wiki CMS Groupware" message (y/n)		
<code>version</code>	alpha	Tiki version info (y/n)		

Here is how you can access these options:
Make sure you are logged in as Admin!

1. Navigate to Admin > Modules.
2. Click on the Configure or Edit icon next to the Powered By module.
3. Adjust the options in the settings panel and save changes.
