### **Apply Profiles tab**

#### Overview

Use this tab to select an apply a profile from a repository to your Tiki

#### **To Access**

From the Profiles Admin page, click the Apply Profiles tab.

#### Note

Starting in Tiki3 the profile system is a powerful and versatile system that can be managed by the Tiki community. See <a href="http://profiles.tiki.org">http://profiles.tiki.org</a>. Profiles give the installer a choice of partially configured sites to install. They give a head start on the configuration process by picking a type of site that is similar in purpose.

Field name	Description	Value

Starting in version 2.x (as a hidden feature) and specially after 3.x, you can point your browser to **tiki-admin.php?page=profiles** ("Admin home > Profiles"), allowing to set up at any time bunches of features in a certain way to produce specific use case of interest.

New Tiki 2.x and 3.x profile system

Old profile system (< Tiki 2.x)

In Tiki 1.9, profiles were only active during the installation process. You could not go back and pick a different profile unless you re-installed the database, losing all your changes.

#### **Related Topics**

- Installation
- Configuration
- Tiki Profiles Repository

#### Requirements

Your php must have the option allow\_url\_fopen On or must have the library curl installed. Javascript must also be enabled on your browser

## **Details of Supported Profiles**

### Tiki 3.x

# Tiki 3.x

See http://profiles.tiki.org

"Profiles" up to Tiki 1.9.x was a feature used only when you install Tikiwiki. It set up the Tikiwiki according to an existing configuration that was "saved" from another site.

Until version 2.x, this feature is only active during the installation process. You could not go back and pick a different profile unless you re-installed the database, losing all your changes.
