

How to search currency amounts

Trackers can be used to tracked financial data with the [Currency Amount Tracker Field](#).

In which case, you'll likely want to search the data. *Where is this amount tracked?*

If you are looking for a specific amount, you can do a search (in the global search box) with the currency. Valid format examples:

- 498.33USD
- 8.95CAD
- 875CAD
- 875.00CAD

This will work well with [Manticore Search](#) and [Elasticsearch](#). To be tested with the [MySQL](#) and [MariaDB](#) indexes.
