

Module `directory_top_sites`

This is a [stub](#). Some [screenshot](#) is needed

Parameters

Displays the specified number of the directory sites from most visited to least visited.

[Go to the source code](#)

Preferences required: `feature_directory`

Parameters	Accepted Values	Description	Default	Since
<code>maxdesc</code>	<code>int</code>	If <code>desc = "y"</code> , use <code>maxdesc</code> to set the maximum length of the directory site (in characters). Leave blank to set no maximum (show the entire description). Default: blank.		
<code>desc</code>	<code>word</code>	If set to <code>"y"</code> , the description of the directory site appears. Default: <code>"n"</code> .
