

Module permissions

New in [Tiki19](#) (and probably better in [Tiki20](#)), this module lists the permissions for current object.

It help site admins know which group has which permission on the current object, and how (ex.: object permissions vs category permissions vs global permissions)

Related Topics

Usage

Module

```
{MODULE(module=permissions)}. {MODULE}
```

Parameters

As of 2019-06-21, the module has no parameters. @developers: please test and add parameters as you see fit

List of active permissions for current object

[Go to the source code](#)

Parameters

no parameters

Example

This is a screenshot of the module in use at <https://dev.tiki.org/> (visible to logged in users only)

The screenshot shows a list of permissions applied from the global level. It is organized into sections: wiki, tiki, and comments. Each section lists specific permissions with their respective help icons.

Section	Permissions
wiki	admin_wiki, view, edit, upload_picture, rename, wiki_view_history, wiki_view_source, use_as_template, wiki_attach_files, wiki_view_attachments, wiki_view_comments, view_backlink
tiki	modify_object_categories
comments	read_comments, post_comments
