

{THUMB(id=94,original=y)}{THUMB}

Parameters

- Mandatory
 - $\circ~$ image : the local path to the image file (won't work with remote files)

or

- o id: the image Id
- Optional
 - $\circ\ url:$ the url of the link
 - o max: indicate the max width or height (whichever is higher) for the thumbnail (default 84)
 - $\circ~$ float : none (default), left or right to make the text run around the thumbnail if wanted
 - \circ data: it's the special plugin parameter to name what is between the tags. If text is included there, it will be printed over the image. This can be weird, but fun.
 - \circ original: y optional if it is an image of a scale gallery, the popup will display the original iamge, otherwise, the scaled image
 - o sticky: y|n default n ioptional to have a sticky popup (tw 1.10)

Note

• for tw <1.9.8, you must specify url
