PluginXMPP

New in [Tiki19](#) is a way to embed an [XMPP](#) chatroom in a wiki page, powered by [ConverseJS](#). See also [Module XMPP](#)

    {xmpp room="general" view_mode="embedded"}

A chatbox will appear in the middle of the page. This chatbox is a group chat, where many users can send messages. You can create a room for each discussion topic.

Parameters

Chat using Xmpp
Introduced in Tiki 19. Required parameters are in **bold**.
