

Tiki Manager Package

Starting in [Tiki25](#), [Tiki Manager](#) can be added as a [Package](#) to any Tiki instance. It has many uses, including [Automatic updates](#). This replaces the standalone [Tiki Manager Web UI](#) with something more robust and flexible.

Command Line

2022-04-15 14:33:30

When the Tiki Manager Package is installed, these commands appear in php tiki-console.php

gallery	
gallery.migrate	Migrate images from the Image Gallery to the File Gallery

manager.webmanager.enable	Activate Tiki Manager web administration
ml.train	Train a particular machine learning model
multitiki	
multitiki.list	List Multitiki on a path
multitiki.move	Move a Multitiki site from one tiki instance to another
notification	
notification.digest	Send out email notification digests

Web Interface

As of 2022-07-05, this is functional in trunk, but for more interactivity and reliability, we will add support for [Realtime](#).

Back-end admin panel

See the Tiki Manager link in the admin menu (`tiki-ajax_services.php?controller=manager&action=index`). This is the full back-end interface

Tracker field

[Tiki Manager Tracker Field](#) is for when you want to have meta data associated to your instances, or if you want to launch Tiki instances from Tracker items.

Wiki Plugins

- [PluginTikiManager](#) is for when you want to present a simple user interface, with a subset of functionality.
- [PluginTikiManagerClone](#)
- [PluginTikiManagerUpdate](#)

Virtualmin

- If you connect to a Virtualmin instance, you get even more features:
