

Using Copyright Management

Use the [Copyright](#) feature to automatically include a copyright statement on specific pages, link to a full license page, and add the copyright information when printing.

1. Enable and configure the feature on the [Copyright](#) Admin page.
2. If enabled for [Wiki](#) pages:
 - o Tiki will add the following statement at the bottom of each page, with a link to your **License Page**:

The content on this page is licensed under the terms of the Copyright License Page

- o When editing wiki pages, the following Copyright fields appear:

The screenshot shows the 'Edit page' tab selected in the top navigation bar. Under the 'Properties' tab, there is a 'Copyright' section with fields for 'Title', 'Year', and 'Authors'. Below this is a 'License' section with a dropdown menu set to 'Copyright License Page'. At the bottom of the page, there is an 'Important' notice titled 'Copyright Submission Notice'.

This allows users submitting content to attach a copyright notice to the page. The user enters the title of work being copyright (which may or may not be different to the page title), the year of copyright and the author(s) associated with the content.

Normal users can only add copyright notices to a page, and only administrators can delete or modify submitted ones. Copyright notices can then be recalled using the [Copyright Notice Plugin](#).

- o When printing a page, Tiki will automatically include the full **License Page**.
