Image Galleries questions

Posted by [Rick Cogley](#) Sun 18 Jan, 2004 05:05 GMT-0000 posts: 10

Can anyone help on this, with regard to Image Galleries -

- bulk uploads. You are supposed to be able to upload a zip according to 1.6 docs, but it never works for me. Does it work for 1.8, and are there any linked settings somewhere in other admin areas that could be tricky?
- regex. You can control how images are uploaded using regex, but though I have heard of regular expressions, I don't know how to do this. Can someone give an example, if, say, I want to limit the name to image files that start with "Tiki".

Still, on 1.8rc3+cvs changes, I am having consistency problems with image uploads. Sometimes it works, and sometimes it doesn't. Hopefully one of the talented programmers can put their efforts into this area.

Thanks

Rick

bulk(?) upload...

It works for me now. What's your problem? You'll see a link to a bug report from ImageGalleryDev

yes, I read somewhere that you can upload a zip of a bunch of jpegs or pngs, and they get unzipped at the server, and processed.
